

# 10,000psi 4 Stage IHPU

The 10000psi 4 Stage IHPU can be used for numerous Subsea applications including pressure testing, BOP operation, fluid transfer and hot stab operations with the capability for 4 selectable pressures each ranging from 0–10000psi. Designed to be easily and simply reconfigured, with the minimum of hassle.

Connection can be made to any sized fluid reservoir and operate using Water/ Glycol and Hydraulic mineral oils as suitable fluid media.

- Hydraulic Input
  - Pressure 210Bar (3000psi)
  - Flow 35–65Lmin
- Hydraulic Output
  - Pressure 690Bar (10000psi)
  - Flow 30Lmin
- Directional Control up to 5000psi
- 4 Selectable Pressures up to 10000psi
- Fluids
  - Water/Glycol
  - Hydraulic Mineral Oil
- Easily re-configured for numerous subsea applications
