EXPERIENCE, DEDICATION AND VISION

Introducing Forum Energy Technologies – a global provider of manufactured technologies and applied products and services. We may be a new name to you but our equipment and employees have a long history of solving our customers’ challenges. FET brings together some of the most well-known brands in our industry with an extensive range of mission critical products and services. We are building a world class company to bring innovative solutions to our worldwide customers. With offices in the key oilfield distribution centers of the globe, Forum is well-positioned to supply our clients with the equipment and related services that improve safety and performance and lower operating costs.

Forum’s products and services range from the underwater reservoir to the refinery, from the sea floor to the above ground transportation line. We pride ourselves on giving you a comprehensive offering of solutions to maximize your operations and improve your bottom line. Our customers are our partners and we work with them to solve their ever-changing challenges.

THERE'S A NEW NAME IN THE OILPATCH ▶▶▶

Introducing Forum Energy Technologies -- with some of the most innovative and robust solutions to your challenges.

T1000 Trencher

SUBSEA VEHICLES

Forum's subsea vehicle brands include some of the most well-known names in the industry – Perry and sub-Atlantic – and offer the world's most comprehensive range of remotely operated vehicles used for inspection, survey, and deep water construction. From electric observation ROVs to large, hydraulic work-class vehicles, Forum has the solution. Our trenchers and tether management systems can be purchased independently of the vehicles.

Forum offers a complete suite of subsea solutions including ROVs, tethering systems, simulation software, geosciences product management. Most of our products are available for rental, as well as the people to run them.

Forum's industry proven software-based controls technologies and proprietary ICE™ controls engine have a wide range of applications and can be integrated into a customer's product as well as our own vehicles and related products.

SUBSEA SERVICES

Forum offers a comprehensive range of complementary services including the rental of products such as ROVs, tooling, subsea survey and positioning systems, and sensors. We also offer specialist personnel and training services as well as equipment support, servicing, and management services. These services are available through our global infrastructure, including Forum facilities and key locations such as Houston, Aberdeen, Singapore, and soon in Brazil.

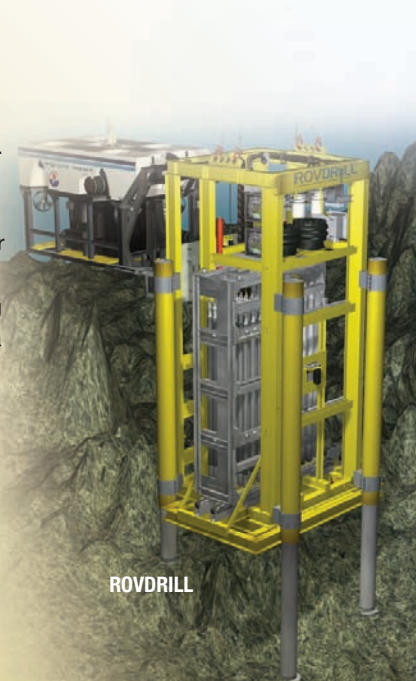

Forum also provides a suite of software products and services in physics-based simulation and 3D visualization, digital video editing capability, and other data processing and data management applications. Through our Geosciences product line, we provide geosciences project management and data analysis for seabed geotechnical coring. Turn to Forum for the subsea services crucial to the success of your next seafloor project.

SUBSEA PRODUCTS

Forum's Subsea Products, include specialist technology-based services, consultancy-based engineering services and integrated service packages. Our experienced personnel can design and build intervention tooling and remote control solutions as standard products or for customized applications on the sea floor.

Our Offshore Joint Services brand is a world leader in the application of protective coatings on subsea rigid pipeline field joints, spools, and structures. These coatings provide an incomparable defense against mechanical damage, loss of thermal properties, corrosion, and water intrusion.

Our products also include a specialized tool for seafloor geotechnical coring, a wide range of thrusters, and dynamic positioning systems. And Forum's pioneering Rovdrill® drilling system is an innovative way to drill smarter and deeper. Our VMAX 3D simulation software is helping operators plan critical subsea operations before beginning the project.

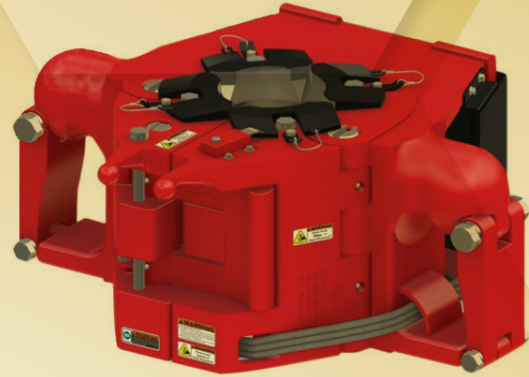

ROVDRILL

RIG EQUIPMENT

Forum's array of robust drilling rig equipment has long been known in the oilfield for quality, reliability, and efficiency. We brought together some of the most respected brands and knowledge experts in our industry to provide our customers the most innovative, dependable products available. Our goal is to reduce your downtime and improve your efficiency. We manufacture all of our products and can customize to our client's specifications. Working with our customers to find a solution to their challenges is an everyday occurrence at Forum. Turn to Forum for the highest quality:

- Tubular handling equipment
- Hydraulic catwalks
- Rotary & drill collar slips
- Safety clamps
- Casing slips and scrapers
- Elevators
- Stabbing guides
- Mousehole tools
- Iron roughnecks
- Tongs
- Drilling instrumentation
- Advanced driller monitoring systems
- Pneumatic mud monitoring systems
- Drillers consoles
- Weight and torque indicators
- Bulk tank & tachometer systems
- Mud pump pressure indicator systems
- Crane load and radius indicator systems
- Drift indicator systems
- Bearings and seals
- Manifolds & piping
- Drilling manifold systems
- High pressure piping packages
- Pressure vessels
- Wrought and forged fittings
- Flanges and connectors
- General valve packages
- Hose and coupling packages
- Hubs and clamps
- Hammer lug unions

XP1000 Elevator

Forum also specializes in coiled tubing and wireline equipment. Our products are purposely built to be easy to operate, simple to service and meet or exceed industry standards:

- High pressure blowout preventers
- Lubricators
- Wellhead adapter flanges
- Kelly valves
- Accessories
- Wireline pickoffs
- Wireline strings and tools

FLOW CONTROL

Sometimes the success of your operations comes down to a single valve or pump. Our pumps and valves products include drilling and production parts reflective of decades of engineering expertise.

- Centrifugal pumps
- Drill pipe float valves
- Fluid end pump parts
- Mud gate valves
- Hydraulic hand pumps
- Mudhog centrifugal pumps
- Open side pipe vises
- Lube/thread compound
- Control/choke valves
- Btc gate valves
- Diaphragm actuated gate valves (DAV)
- Enhanced oil recovery products (EOR)

Hydraulic catwalk

PRODUCTION EQUIPMENT

Forum provides engineered process systems and field services from the well head to inside the refinery fence. We provide the upstream, midstream and downstream segments with oil and gas production equipment and services. Our broad range of products and strategic shale play locations position us as a process systems specialist. We offer standard products as well as customized fabrication and systems

Tanks

- API 12F Steel tanks
- API 12P Fiberglass tanks
- Gun barrels

Separators

- High pressure/low pressure separators
- 2 phase/3 phase separators
- Vertical/horizontal separators
- Filter & sand separators
- Vertical/horizontal heater treaters
- Slug catchers
- TEG dehydration units

EDGE™

- Crude desalters
- Crude dehydrators

NG Dehydration units

- Custom fabrication and systems
- Wellhead production skids
- Flow control packages
- Modular process plants
- Pilot plants
- Process skids
- Liquid/gas measurement skids
- Modular process plants
- Compressor manifolds
- Meter tubes
- Process pipe spooling skids
- Flowback test equipment
- Water treating

Pipeline Equipment

- Launchers
- Receivers
- Flow control packages
- Pigging separators
- Process pipe spooling
- Liquid meter systems
- Meter prover systems

COMPLETION PRODUCTS

Forum's flowline rebuild and certification facilities provide complete and detailed rebuild and recertification of frac iron such as swivel joints, pup joints, plug valves, check valves, and relief valves. Our mobile rebuild teams provide flow line and valve maintenance, repair, ultrasonic and hydrostatic testing at our clients locations to ensure safety, minimize down time and maximize return on investment. Services and products include:

- Frac and flowback iron
- Frac iron inspection and certification
- Crossovers, bull plugs and swages
- Manifold trailers
- Swivel joints
- Pup joints
- Mobile rebuild and recertification

Ball valves
manufactured
by PBV

VALVES

From the wellhead to the refinery stack to every other critical service point in a wide array of industries, Forum Energy Technologies provides valves and actuators as well as engineering, delivery and support services. We leverage our technical expertise, quality systems and global sourcing network to deliver unmatched reliability and operational performance to our customers-with the goal of making a bottom-line difference to your operational and financial performance. Our well respected brands include ABZ, DSI, Quadrant and PBV and offer one of the most extensive ranges of products in the industry.

DSI

- Multi-turn cast and forged steel valves
- WCB, LCC, low and high alloy materials

PBV

- Floating and trunnion API 6D ball valves
- High performance and metal seated ball valves

Quadrant

- Seal welded, threaded ,weld end and flanged floating ball valves
- ASTM/API/ASME certified
- Actuators and accessories

ABZ

- Rubber seated and teflon-line butterfly valves
- High performance butterfly valves
- Triple offset butterfly valves
- Actuators

Compression station

Our goal is to become the leading provider of mission critical oilfield products and related services in terms of customer satisfaction, safety and financial performance.

Our experienced management team and employees are dedicated to solving our customers' problems. We invest in long term relationships and cooperate on product development with our clients, we consider them our partners. Our goal is to be our customers' supplier of choice.

OUR CORE VALUES

Integrity – In everything we do, in every interaction, both internally and externally, we strive to operate with the upmost integrity and mutual respect.

Long-term view – We are building our company for the long-term, a company that we can be proud of.

Open communication – We believe partnerships with our customers and co-workers must be based on trust, professionalism, and transparency.

Customer focused – Our products enhance our customer's performance and we listen to their needs working with them to solve their challenges.

Good place to work – We are committed to creating a workplace that fosters innovation, teamwork and pride. Every team member is integral to our success and is treated equally and fairly.

No one gets hurt – The safety of our employees and customers is our first priority coupled with a healthy respect for the environment.
