

## 2-20LPM 690 Bar Flow Meter System

ROV Tools.

### DESCRIPTION

The 2-20LPM 690 Bar Flow meter system combines a flow meter with a standard Universal Subsea Display to locally display a flow value subsea. The flow meter is rated to a maximum of 690 Bar working pressure and 20LPM maximum flow. The system is supplied with a battery for powering the display, but the unit can also be supplied power direct from the ROV, there is a flying lead supplied in the kit to allow for this option.

The USD uses ultra-efficient LED types, a very low power processor and sophisticated power switching regulators which, together, mean it can operate from a wide DC voltage input range, requiring very low current and equally able to operate from ROV supply or from battery. In addition, it has a software configurable sleep mode with option to wake up on sensor activity or from the light sensor on the front face.

### FEATURES

- Flow range 2-20LPM
- Pressure rating 690Bar max
- Rated to 3,000m ocean depth
- Complete system mounted in compact unit
- Supplied in offshore suitable transit case

# 2-20LPM 690 Bar Flow Meter System

## ROV Tools.

### SPECIFICATIONS

Depth Rating	3,000m(10,000feet)
Flow range	2-20LPM
Max Pressure rating	690 Bar (10,000PSI)

### WHAT'S IN THE BOX

- USD
- Battery Pack
- Flowmeter & transducer
- Flowmeter to USD cable
- Mounting plate for system
- Battery Charger
- Programming Cable and Software
- Battery pack to USB Cable
- USD to ROV Flying lead (power)
- Test certificate
- Operations & Maintenance Manual

### PART NUMBERS & OPTIONS

A036-037-520/01      USD & Flowmeter mounting kit
