

ROV Push Corer

ROV Tools.

DESCRIPTION

The devices are designed to be operated by ROV's to obtain sediment cores in shallow or deep water applications. Available in two standard sizes, the push corers consist of a Perspex tube, one way valve and ROV T-bar handle. Traditionally sediment coring is undertaken remotely from surface vessels, however use of an ROV facilitates the ability to take multiple and high quality cores from highly targeted locations with specific seabed types or habitats, for biological, physical or chemical analysis.

FEATURES

- Stainless steel and plastic non corrosive materials
