

## Hydraulic Dredge Pump

Dredging & Jetting Tools.

### DESCRIPTION

The Hydraulic Dredge Pump is the lightest, most efficient way to move large volumes of liquid with concentrations of solids up to 25% by volume.

The urethane bowl is virtually indestructible - tough, lightweight, abrasion resistant, resilient and impervious to petrochemical solvents. The pump pumps almost anything without damaging the bowl. The efficient design places the urethane impeller above material flow, reducing blockage, jamming and overall pump wear while keeping liquids moving fast enough to pump high volumes of solids at a much higher head than non-submersible pumps.

For easy maintenance and inspection, simply remove the wing nuts and top plate, clean out the bowl and replace the cover and nuts. You're back to work in less than 5 minutes. No priming necessary. The pump can run dry without damaging motor or impeller, reducing the possibility of downtime. The pump handles solids up to 3-inches at very high volumes quickly and efficiently.

### FEATURES

Dredge 1,688 Lpm

Excavate up to 3" solids

Run dry without damage

Only 14.5 kg in air

# Hydraulic Dredge Pump

## Dredging & Jetting Tools.

### SPECIFICATIONS

Max Hydraulic Input	140Bar (2,000psi)
Flow Input	34LPM
Max Output Flow	1,688LPM
Weight in air	14.5kg

### WHAT'S IN THE BOX

Hydraulic Dredge Pump  
Operational hoses  
Operation & Maintenance Manual

### PART NUMBERS & OPTIONS

SRTS-013	Hydraulic Dredge Pump
SRTS-013-S	Hydraulic Dredge Pump spares kit
