

## HLA 15K

Forum's HLA 15K combines unmatched simplicity and safety in a field repairable platform, offering more remotely controlled OEM solutions than any other quick connection in the oilfield. Forum's HLA 15K's full suite of solutions allows you to keep your crews out of the hot-zone and maximize your operations.

### Applications

- High pressure (15KSI) operations

### Benefits

- Remotely rig up, operate Lift Night Caps, and launch frac balls
- 30-40% approximate times savings over traditional man basket operations
- Increases uptime by enabling more simultaneous operations of frac and wireline crews
- Can be repaired in as little as 15 minutes in the field

### Features

- 15KSI Pressure Rating
- Automated Lift Night Cap
- Automated Frac Ball Launcher
- Sensors with indicator lights to ensure safe operation of equipment
- Highly visible entry guide

### Options

- Remote Monitoring Capabilities
- Remotely Operated Lift Night Cap
- Remotely Operated Frac Ball Launcher
- Single and Multi-Unit control panels
- Standard and Self Powered control panels
