

Liquid Immersion Cooling Solutions

Rugged fluid-to-air cooling options for high-performance computing, data centers and cryptocurrency mining

▶ Customized to Suit Your Needs

- Multiple core material options, fin and tube designs suitable for a variety of environments
- Offshore and corrosion resistant coating options available
- Made-to-order engineering and manufactured in-house, per customer requirements
- Multiple fan motor options available ranging from electric (12/24V DC or AC motor), hydraulic or pneumatic motors
- Custom wet-paint options available
- Sound mitigation options available

▶ Quality Construction

- Heavy gauge construction to meet the most rugged environments
- Can operate in arctic conditions as well as high ambient conditions
- Low Maintenance required

▶ Quality Engineering

- CRN / ABSA Certified
- Operating pressure options up to 700 psi

Liquid Immersion Cooling Solutions

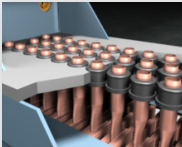

Rugged fluid-to-air cooling options for high-performance computing, data centers and cryptocurrency mining

► Why Choose GHT?

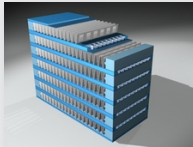

GHT is a manufacturer of custom engineered cooling solutions tailored for the customers' specific application

As a leader in the cooling industry since 1978, GHT is proud to offer high-quality cooling solutions suited to handle even the most rigorous of applications. Delivering low-cost of ownership for standard and custom-engineered cooling systems. Contact our team to learn how we can extend the life of your equipment, at GHT@f-e-t.com.

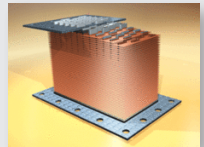

► Core Offering

Rubber
Grommetized Tube

Aluminum Plate & Bar

Industrial Bolt-On

► Quality Cooling on a Global Scale

GHT is proud to be a global manufacturer serving quality cooling throughout the world.

CANADA

Edmonton

CHINA

Shanghai

Nantong

USA

Houston

Midland
